### WINDOWS and EXCEL settings

In Windows settings check that the decimal symbol is a point and not a coma. (Note that the change will not affect older files).

#### Windows 2000 users:

Start menu > Settings > Settings panel > Region options >In the tab "Numbers" > Decimal symbol > Insert the character "point".

#### Windows XP users:

Start menu > Control panel > Date, Time, Language and Regional Options > Choose 'Regional and Language Options' > Tab 'Regional Options' > Click "Customise" > In the tab "Numbers" > Decimal symbol > Insert the character "point".

#### Windows 7 users:

Start menu > Control panel > Clock, Language and Region > Language and Region > Modify Clock and Date or Number Format > Button "Additional settings..." > Decimal symbol > Insert the character "point".

#### Windows 8 users:

Point the mouse to the lower-right corner of the screen and move the mouse pointer up > Click "Settings" > Control panel > Region > Button "Additional settings..." > Decimal symbol > Insert the character "point".

- 5. Tick: "Medium..."
- 6. In the tab "Trusted Publishers", tick: "Trust..."

#### Excel 2007 / 2010 / 2013

- 1. Launch Excel
- 2. For Excel 2007 : click on the button "Office" and then "Excel Options". For Excel 2010 and 2013: click on "File" and then "Options"
- 3. Click on "advanced", then tick "Use system separators"
- 4. Click on "Trust center", then click on "Trust center settings"
- 5. Click on "Macro settings"
- 6. Tick the box: "Trust access to the VBA project model".

#### Windows VISTA users:

Start menu > Control panel > Clock, Language and Region > Modify Clock and Date or Number Format > Click "Customise this format" > Decimal symbol > Insert the character "point".

### Excel 2003

- 1. Launch Excel
- 2. Go to: Tools > Options > Tab "International"
- 3. Tick: "Use system separators"
- 4. Go to: Tools > Macro > Security > Tab "Security level"
