

AF.10 AUTOFLUID

Welcome

Thank you for choosing **RVT-Connect**,
the **AUTOFLUID** plug-in for **Revit**.
These are your install instructions.

Instructions version 1

The CAD application suite for fluid professionals

Install RVT-Connect from www.autofluid.fr

The install must be performed in Windows in **Admin mode** and **Revit must be shut down**.

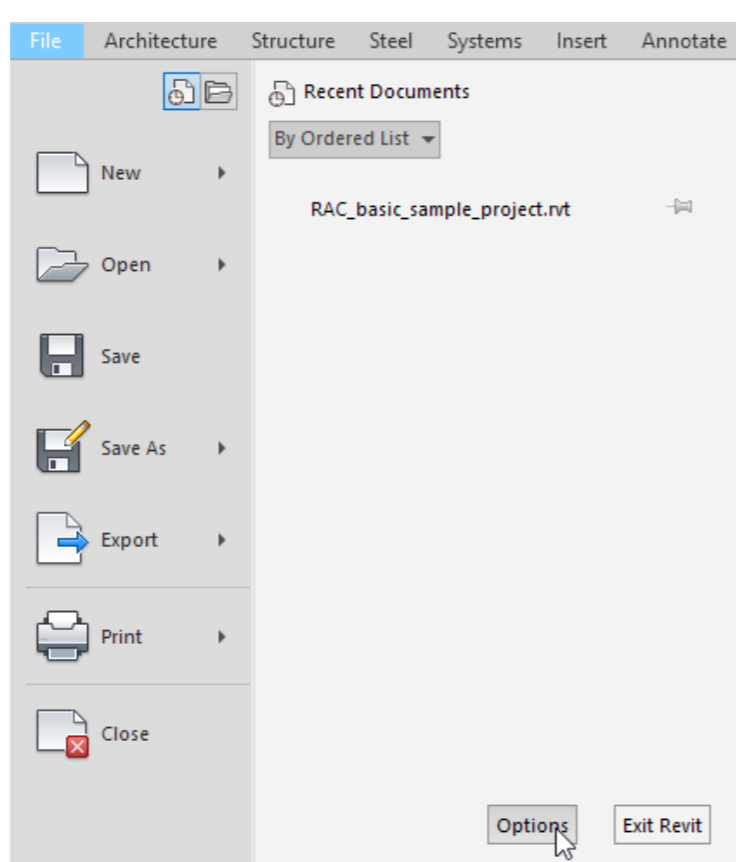

Download the file:
« Setup_RVT-Connect_Revit20xx_...MSI » from
received from our sales department

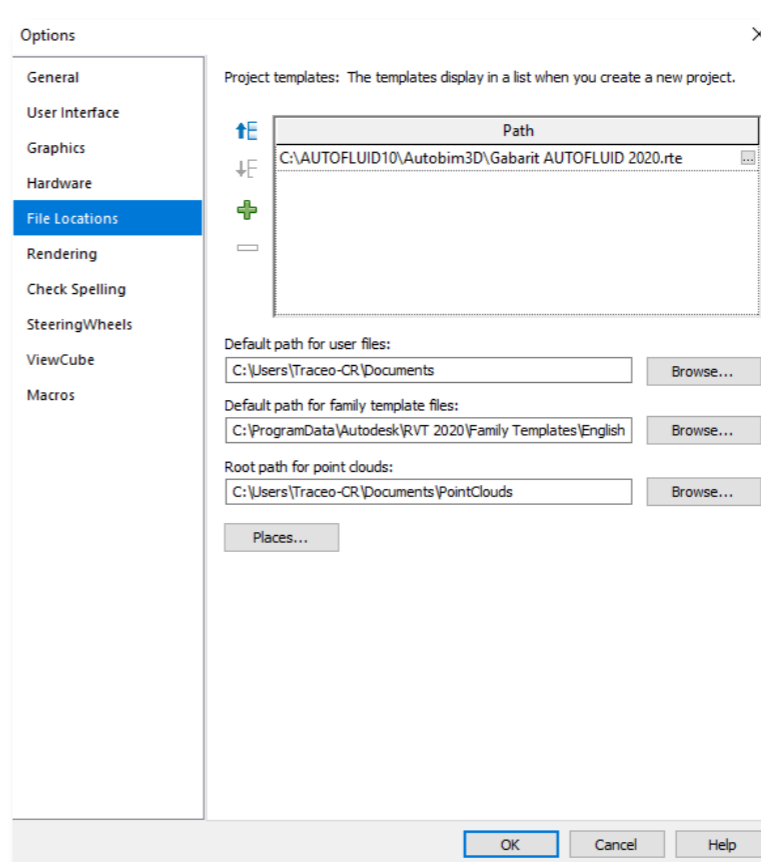

Setup_RVT-Connect_Revit20xx_...MSI

Right click >
"Run as administrator"

AUTOFLUID users only: add the template in Revit

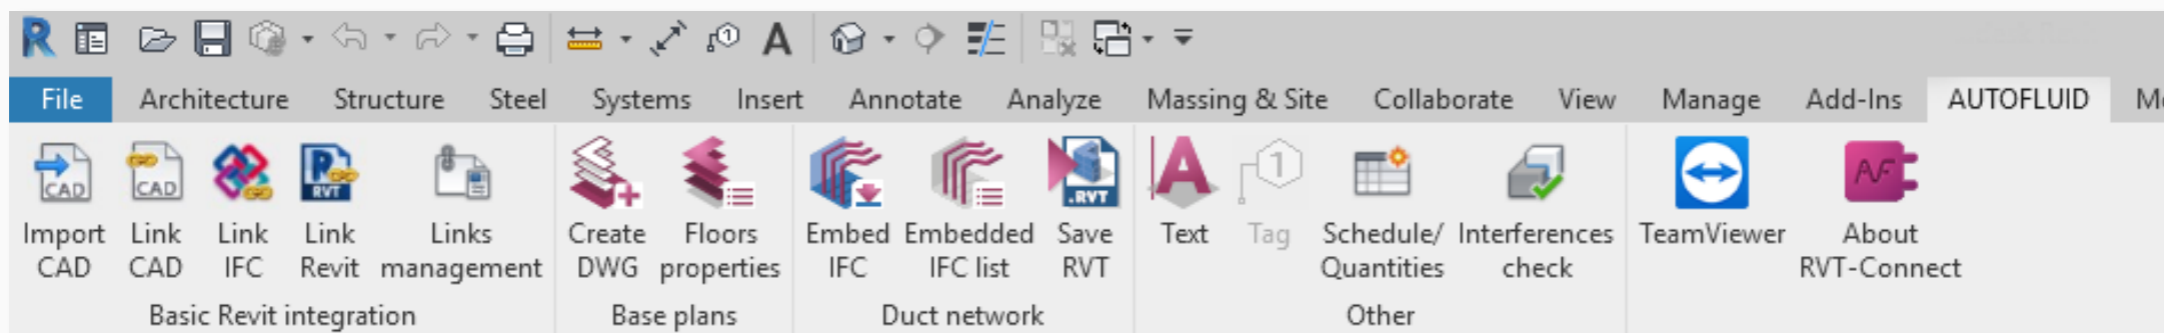

In the File menu choose «Options».

Choose «File Location», and add (+) the template file. Follow the file path in the illustration above to locate it.

The RVT-Connect tool bar is now ready to use in Revit !

If you encounter problems during the install you can check the FAQs on our support page (www.autofluid.fr > Support) and fill in the support form to be called back by a technician. Alternatively call our free hotline on +33 (0)4 86 79 20 02.

Tracéocad frequently release free updates on their software. Please refer to our download page on www.autofluid.fr.
Subscribe to our newsletter to be kept informed when new free patches are released.
